

into the woods

Residential Kitchen: \$100,000 to \$150,000

To free up space, we moved the oven into the new range, replacing the cooktop, and placed the microwave in the island. This cleared that kitchen corner and created cohesive spaces. We paneled all large appliances for continuity and extended the cabinetry into the family room, adding storage and carrying the serene wood theme throughout.

proposed plan

Right: Digital rendering shown to client demonstrating intent.

before

Dated cherry cabinets,
not enough
counterspace or
storage.

after

New microwave location, very light gray countertops blend harmoniously with shaker cabinets.

before

Microwave/oven bank taking up valuable counterspace, and cluttering kitchen visually.

after

Deep functional drawers alleviate clutter in this new kitchen, and the new curved island cabinet doors become a functional drop off zone for the family.

before

Family room looking towards kitchen captures pantry and refrigerator bank. Note: tile flooring and carpeting. Also, lack of decorative lighting.

after

New family room cabinets providing so much freedom from clutter. Also, we chose lvp flooring in the same hue and tone to the countertops creating a serene and tranquil environment.

before

Prior island, did not provide enough storage, end cap shelves were too shallow to provide any value.

after

Not only does the island provide ample storage, but soft glass fixtures cast a warm glow over the countertops.

before

Entertainment area.

after

New entertainment center with hidden speakers and decorative floating shelves.

- Appliances: Thermador Blower/Range, Miele Dishwasher
-
- Flooring: Paradigm Conquest LVP in Tower
-
